

Upgrade with Confidence. Operate with Certainty.

When legacy controls start holding you back, Axis Engineering helps you move forward. From PLC migrations to complete control system overhauls, we modernize your automation with minimal downtime and maximum reliability.

With over 25 years of control system experience, we make the OLD run like NEW — safely, efficiently, and with FUTURE-READY technology.

We specialize in upgrading and integrating leading control system platforms, including:

Rockwell/Allen-Bradley (PLC-2 PLC-5, SLC 500, MicroLogix systems), as well as **Omron, Mitsubishi, Siemens PLCs** and **DeltaV DCS** platforms. HMI/SCADA including **Wonderware, & Ignition**.

Whether your challenge is obsolescence, connectivity, or compliance, we deliver systems that perform better, last longer, and integrate seamlessly across your plant.

Why Axis Engineering

We combine controls engineering, system integration, and on-site expertise to ensure your upgrade is seamless and future-ready.

- ✓ Reduced downtime & maintenance costs
- ✓ Improved safety & product quality
- ✓ Clear documentation & training
- ✓ 24/7 responsiveness when you need it

Applications Across Industries

Hundreds of systems. Dozens of industries. One trusted integration team.

- ✓ Manufacturing & OEM Equipment
- ✓ Food & Beverage & Packaging
- ✓ Material Handling & Process Automation
- ✓ Chemical, Plastics and Mining

Full Control Modernization

Every upgrade is an opportunity to improve more than just the PLC.

- ✓ Outdated hardware replacements
- ✓ Network & communication upgrades
- ✓ Safety & compliance updates
- ✓ Servo & motion control integration
- ✓ HMI & visualization improvements

When uptime depends on it, trust the team that integrates everything.
